PROFESSIONAL SUMMARY

Graduate in **Web Application Development** with **2 years of professional experience** building custom web applications in production environments. Specialized in Backend architecture with PHP and Laravel, applying SOLID principles, working under Agile (Scrum) methodologies, complex enterprise API integrations, SQL relational database optimization, and Docker deployment management. Focused on clean code, software best practices, and efficient technical problem solving.

RECENT PROFESSIONAL EXPERIENCE

Full Stack Web Developer
10/2024 – 10/2026
Xerintel Internet Technologies

- Development, architecture, and continuous maintenance of custom production web applications using PHP 8+, Laravel, JavaScript, HTML5, and CSS3/Tailwind.
- Rigorous application of SOLID principles and design patterns to ensure software scalability, readability, and maintainability.
- Bi-directional integration of enterprise REST APIs and payment gateways (Salesforce CRM, Stripe TPV, NEXO ITREM, Google Maps API).
- Design, structuring, relational modeling, and query optimization for MySQL databases.
- Management and customization of advanced administrative suites using Filament PHP and Voyager CMS.
- Team collaboration under Agile/Scrum methodologies with sprint planning and Git/GitHub version control.
- Deployment workflows with Docker environment management and AI-assisted development.

Purchasing & International Operations Specialist
03/2022 – 09/2022
Bayport Global Supplies

- Management of commercial operations and negotiation with national and international suppliers in English (C1) and Spanish.
- Advanced management of inventory databases, pricing structures, and global logistics catalogs.
- Preparation of quotes and data processing for international clients.
